

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Baucum

Application No.: 10/634,256

Filing Date: August 5, 2003

For: Alternative Alternating Current Power Supply

Examiner: Wallis

Group A.U.: 2835

Mail Stop – Amendment  
Commissioner for Patents  
P. O. Box 1450  
Alexandria, Virginia 22313-1450

**INTERVIEW SUMMARY**

Dear Sir:

The applicant appreciates the Examiner Michael Rutland Wallis conducting an interview via telephone on Tuesday, October 10, 2006, at 2 p.m., with the applicant and counsel. The principal cited reference as well as claim limitations and proposed amendments to the claims were discussed which would be considered with the filing of a request for continued examination.

Specifically, it was discussed to make it clear that the power was being supplied to the electrical distribution system through a first outlet as opposed to a power inlet. Secondly, it was discussed that the method related more to the provision of a back up power source and not so much to the use of a temporary power connector. A discussion of the differences between normal generator backup supply systems and the applicant's preferred method were discussed.

The applicant sincerely appreciates the Examiner for his time and for this interview.

Respectfully submitted,

Date: October 16, 2006
